

Safety Guidelines for Lithium Batteries

✓ Allowed carry-on items Prohibited in Checked Baggage

1. Power banks

ALLOWED CARRY-ON ✓

Short-circuit prevention required
(Taping or store in plastic bags)

MAX: Under 160Wh → Up to 2

* Based on 3.7V

NOT ALLOWED CARRY-ON ✗

[NOTE] Energy(Wh) = Current(mAh)×Voltage(V)÷1,000

Do NOT use, charge, or store power banks and e-cigarettes in overhead bins

2. Spare batteries

* Removable batteries for electronic devices

100Wh or less

MAX 5

over 5

Airline approval required & green label must be attached

✓ Short-circuit prevention required
(Taping or store in plastic bags)

100Wh~160Wh

MAX 2

Airline approval required & yellow label must be attached

~~Over 160Wh~~
NOT ALLOWED

If carrying batteries over 100Wh to 160Wh,

→ Total allowed quantity (including power banks) is limited to 2 units

* Electric Wheelchair batteries for passengers with reduced mobility (PRM) can be brought in up to 300Wh

3. Other Electronic devices

E-CIGARETTE

➔ Must be **powered off** and **carried on your person**

Wireless Hair Straighteners / Wireless Irons (Extreme heat devices)

➔ **Allowed only** if the **battery is detachable**,
Battery must be carried in the cabin
